Meeting time: 10:30am
Leaving: 11:00am

This course avoids riding busy roads and is thus targeted towards the children. The journey follows asphalted roads, most of which are rural. Some parts are ascending, it is recommended bikes have gears or kids may have to walk some parts.

Two areas involve crossing a main road and kids will have to dismount. All along the ride there are benches for resting and even a play area if a mental diversion is required.

Some parts lead along the “Alzette” river and there are even two quiet rail-way crossings offering plenty of different experiences for the young ones.

Vince will follow JP's 40 km ride along the Piste cyclable des Trois Cantons (PC6) up to the far side of Parc "Brill" in Schiffflange and then turn around. This ensures that the ride follows asphalted roads and cycle tracks. To join track PC6 you will have to cross over the railway track. After exiting at Kayl you will have to shortly ride the main road to the motorway bridge to join the bicycle-track again.

You will be following the A13 motorway on the bicycle-track which passes under the motorway several times.

The last part is the ride along the "Brill" nature reserve before turning around at km 10 and returning back.

- Piste cyclable des Trois Cantons (PC6)
- Piste cyclable du Faubourg Minier (PC9)

The option on passing via Mondercange (PC6) and adding a few extra kilometers will depend on the situation of the famous Esch landslide and the form of the riders!
